MEMORANDUM OF CONVERSATION:

SUBJECT: Maintenance for New Headquarters Building

Mr. Poorman, Deputy Commissioner, Public Building Service, phoned Mr. James A. Garrison this morning in reference to a previous phone conversation of 19 August. At that time Mr. Poorman had been asked which Agency, GSA or CIA, should budget for maintenance service at the CIA building in Langley, Virginia. Mr. Poorman stated that he felt that this service should be included in the GSA budget.

During the conversation this morning, Mr. Poorman read a letter from GSA to The Honorable A. Willis Robertson, United States Senate, which informed the Senator that since a previous communication dated 8 August, representatives of GSA and CIA have discussed the problem and "we have GSA agreed to operate and maintain the building with appropriations made directly to GSA."

A copy of this letter is being sent to the Director of Logistics.
